1	Zihang was the most wonderful TA I have ever had. He was always available and eager to help whenever we needed it. He always answered questions, supported his students, and helped us to think critically about the material and our project. I imagine he will be an absolutely fantastic professor. For monday recitation sessions I know it is a lot of content but finding a way to focus specifically on project based code or allowing for specific application of the coding would be beneficial I think. Mondays were difficult to follow sometimes because of the amount of content and it being so early in the semester for some of the higher level coding. So appreciative of all the help this semester from Zihang.
2	Loved the fact that you were so accessible and really seemed to care about us as a TA in a smaller class.
3	A difficult course with ample amounts of help. Zihang gave us more than enough resources, assistance, and office hours to learn as much as we could from this course while such large objectives are packed into such a short semester. Has the gift of teaching, passionate about his jobs and it shows inside and outside the classroom. Genuinely wants students to learn the course and excel academically.
